Dear Reader,

If you're headed to the Health Care Design Conference in Nashville, November 14th – 16th, make sure to stop by our NatureMaker Steel Art Trees exhibit to say hello. We have so much to share with you, from sustainability—our trees are made from 75% recycled materials—to safety and low maintenance. Every tree is one-of-a-kind, completely fire retardant, and handcrafted using state-of-the-art engineering – the perfect solution for issues of accessibility and floor weight bearing loads. Their true value, of course, lies in their healing presence. NatureMaker trees combine the beauty of art and nature, helping to elevate the human spirit which aids in the healing process. From the pristine birch stand at St. Joseph Mercy Hospital's 4th floor meditation garden to the whimsical cut-out fig tree at Tucson Medical Center (Children's Hospital), NatureMaker Steel Art Trees complement any type of space, whether it's a high-rise or campus setting. Learn more by visiting us at Booth 110, or contact us at 800-872-1889 or International 001-760-438-4244.
